## PROFESSIONAL SUMMARY

Focused Python Backend Developer with a solid background in designing RESTful APIs, optimizing database performance, and implementing clean, maintainable architectures. Looking to apply strong problem-solving skills and technical depth to create reliable backend solutions in a growth-oriented organization.

## EDUCATION

**2019**  
MG University  
**Master of Computer Applications**  
MACFAST-Thiruvalla  
CGPA: 7.9

**2017**  
MG University  
**Bachelor of Computer Applications**  
PMG-Thiruvalla  
CGPA: 7.5

**2014**  
Kerala  
**HSE-Science**  
MTHSS-Venmoney  
CGPA: 8.25

**2012**  
Kerala  
**SSLC**  
JMHS-Kodukulanji  
CGPA: 9.0

## PROFESSIONAL EXPERIENCES

**2023 - 2025**  
Panasa Technology Pvt. Ltd.

### Python Developer

- Developed scalable REST APIs using Django with clean architecture and modular design.
- Enhanced ORM query performance, reducing redundant DB hits.
- Integrated external services and cloud storage in production workflows.

**2020 - 2023**  
Techwingsys

### Software Developer

- Built secure authentication flows and RESTful APIs using Django and DRF.
- Collaborated with frontend teams to align API structure and delivery.

**2018-2019**  
Riss Technologies

### Associate Software Developer

- Contributed to full-stack development with a focus on backend modules.
- Used Django ORM and raw SQL for optimized database interactions.

# PROJECT HIGHLIGHTS

---

## Neptik

- Designed and implemented an email outreach engine that automates campaign scheduling, tracking, and rescheduling across Gmail/Outlook and other providers.
- Built timezone-aware scheduling with randomized delays and multi-sender load distribution to improve deliverability and avoid spam detection.
- Automated queue management to reschedule missed/failed emails and ensure continuous campaign execution.

## SEND2

- Developed a real-time price comparison app for international money transfers.
- Designed to compare remittance service rates across providers to help users save time and money.
- Empower users with transparency in remittance costs and faster selection of the best service.

## Dialect-TASC Workflow

- Designed and developed an automated workflow engine for efficient task scheduling, assignment, and execution.

## Virtual Health App

- Implemented backend system to enable secure appointment scheduling and patient-doctor communication workflows.

# CERTIFICATIONS

---

- Data Science Certification
- Google Fundamentals of Digital Marketing
- AWS Services Fundamentals
- Python Django 101
- Microsoft Copilot Studio
- Scientific Innovation for Sustainable Development

# TECHNICAL SKILLS
